WELCOME TO AIRBORNE SYSTEMS NA INC.

In June 2001 Airborne Systems, a group of companies owned by Alchemy Partners, increased the size of their operations through the acquisition of the Irvin Group. The Irvin group of companies now join GQ Parachutes Limited, Aircraft Materials Limited and Para-Flite Incorporated, under the umbrella of Airborne Systems. Airborne Systems operates internationally in the field of Military parachutes, ejection seat parachutes, and related aerial delivery equipment. In the UK the acquisition saw the merger of two world leaders in parachute technology under the new name of IRVIN-GQ. The new name preserves the internationally established brand names of both companies and signifies their combined strength in technology, research and development resources, economies of production and achievement of the highest quality standards for Military customers worldwide. Airborne Systems NA Inc. a Delaware corp. is a holding company that combines Irvin Aerospace, Inc. (US), Irvin Aerospace Canada Ltd. and Para-Flite Inc. Airborne Systems NA Inc. is the North American Division of the Airborne Systems Group. We are combining our individual strengths to provide a comprehensive list of products designed to fully meet the airborne equipment requirements of customers through superior proprietary products, innovation, integrity, and quality of products and services. Airborne Systems NA have redefined the keys to success as; uncompromising commitment to the quality of the product, workmanship, design, and quality of end result; innovation; and superior product performance. This is an exciting time for our group with new challenges and unlimited potential. We look forward to the challenges and opportunities of our combined futures.
