

SINGLE ACTION RELLEASE PERSONAL EQUIPMENT LOWERING SYSTEM

Irvin SARPELS is designed to provide a simple and complete load carrying system for the individual paratrooper. SARPELS is compatible with both static line (S/L) and military freefall parachute (MFP) operations.

- ☑ Suitable for multiple use operations and Special Forces in extreme climates.
- ☑ Permits carriage of various configurations of individual combat loads.
- ☑ Equipment bag is expandable for individual requirement for weight ranges of 25-60 LBS.
- ☑ Minimizes damage to equipment on landing.
- ☑ Provides easy access to weapons and equipment after landing.
- ☑ Simple to rig.
- ☑ Enhances safety by reducing the risk of an equipment hang-up.
- ☑ Integrated backpack straps for ease of carriage on the ground.
- ☑ Light aids for night jumps.
- ☑ Fabricated from heavy duty cordura fabric.

Three Modes of Operation

1. Parachutist lands wearing equipment
2. Parachutist lands with equipment lowered
 - Lowered to level of feet
 - Lowered below jumper
3. Parachutist can release equipment prior to landing
 - Release after lowering
 - Release prior to lowering

IRVIN products have been developed and tested for over 75 years to demanding specifications. They are in use worldwide and are endorsed by many nations as products of reliability and quality.
